

THE CHINOOK ADVANCE

Vol. 21

Chinook, Alberta, Thursday, Dec. 9th 1937

No.

LOOK AT THESE VALUES!

G-E BATTERY RADIOS

\$49.95

(Batteries extra)

5-tube table model with 6-inch permanent magnet speaker, automatic volume control, illuminated dial, and slow-motion tuning. A value proposition at \$49.95. See the full line of G-E radios at your dealer—both A.C. and Battery operated sets.

Want Workless Washdays?

Gone is washday drudgery when you have a G-E Washer. It gives you a snowy-white wash without any hard work. The G-E Activator washes the clothes as individual pieces without tangling or braiding.

PRICE \$84.00

If you are without electric power in your home, a G-E gas-driven washer does the same job as the electric model.

Make Home Cleaning Easy with a G-E Air Flo Cleaner!

Its powerful suction gets all the dirt from floor to ceiling—cleans rugs, drapes, furniture, bedding, radiators, etc. 100-volt and 220-volt cleaners available.

PRICE \$59.50

Miscellaneous News

Miss Honor Langley nurse-in-training at the Holy Cross Hospital, arrived here Sunday morning and will spend a month's vacation at the home of her parents, Mr. and Mrs. R. B. Langley.

Born—To Mr and Mrs L. W. Yearick (nee Audrey Neff), Hoadley, Alberta, on Saturday, November 27th in the Hanna Hospital—a daughter.

Mr. E. Gagne, of Innisfail, arrived here on Friday and is visiting with friends and also looking after farm interests.

Mrs. J. C. Bayley is visiting in town with her daughters for a few days.

Mr. Len Cooley left on Tuesday for Calgary where he will take short course at the Ford Service Establishment.

Mrs. A. V. Youell left Tuesday for Saskatoon where she will visit with friends.

Miss Campbell, who has been working for Mrs. Youell for the past two months left for Saskatoon Monday.

Miss Levick, who has been visiting with her parents at Alasko for the past two weeks, returned Sunday.

Mr. J. C. Coutts was a visitor in town over the week end.

The Ladies' Card Club met Tuesday evening with Mrs. Wilson as hostess. Honors were shared by Mrs. Robinson and Mrs. Mortimer. The Club will meet next week at the home of Mrs. Youell.

Curjng Notes

Two weeks of curling have gone by with everything running smoothly. Great enthusiasm has been shown by the members and we trust this will continue, so as to make this the most successful and the most enjoyable season. Interest has been aroused such that a new rink has been formed with N. Nystrom as skip. The total number of rinks is now ten.

Keen competition is shown in that there are no undefeated rinks. On Wednesday, Dec 1st G. Aitken continued his

winning ways with a 12-5 victory J. Gingles. The second game saw C. W. Rideout come from behind to defeat F. Morrell 11-10 on the 13th end.

The next night W. S. Lee gmothered J. Peyton's powerful rink 15-4 and Len Cooley won from J. Gingles 11-7.

Friday saw G. Aitken meet his first defeat when the Aberhart rink skipped by E. Robinson overwhelmed him 16-6 to take the cup.

OBITUARY

The sad news was received here that Mrs. C. E. Neff Hanna, formerly of Chinook passed away after a long illness on Wednesday, at noon, December, 8th. Funeral services will be held on Sunday at 2 o'clock p. m. at Hanna.

A telegram was received here on Friday of the sudden death of Jake Berry, Kansas. Full particulars will be given in next issue of the Advance.

On Monday starting at noon the Chinook district had been visited with another of those terrible blizzards raging night and day until Wednesday morning. The temperature rose to 34 degrees below zero early Wednesday morning.

Mr. R. McKinnon is visiting at Brotons.

Seen around town—a lot of snowbanks.

Trans Canada Air Line

Plan Splendid Hunting Season

Prospects for big-game hunting are unusually bright in Canada this fall. Reports covering the thousands of square miles of wilderness accessible by Canadian Pacific Railway show a plenitude of game and excellent conditions for hunting. Outfitters and guides across the country also report more reservations for hunting parties, both from Canada and the United States, than they have had for years.

Wild sections of Canada lying practically in the back yard of civilization have a wide variety of big game in addition to many types of game birds and smaller animals. Nova Scotia has moose, deer and black bear; New Brunswick, deer and black bear; Quebec, moose, caribou, deer and black bear; Ontario, moose, deer and black bear; Manitoba and Saskatchewan, moose, deer and caribou; Alberta and British Columbia, mountain sheep and goats,

caribou, moose, elk (wapiti), deer, and grizzly, brown and black bear; and the Yukon Territory and Alaska, practically the same as British Columbia. An indication of the increased interest in hunting this year has been given by the number of applications coming to the general tourist offices in Windsor Station, Montreal, for copies of the two hunting booklets, "Open Seasons for Hunting" and "Fishing Waters and Game Reserves."

Need Is Great

As the eighth year of economic and agricultural depression for a substantial area of the Western Canadian prairie provinces moves towards its close the need for the Federal government to assume full financial, if not administrative, responsibility for relief in all its phases, including medical and hospital costs and administration charges becomes more imperative, and not only in the rural districts but in the urban centres as well.

Under the relief set up as it exists to-day in Alberta and Saskatchewan the Federal government has assumed full financial responsibility for direct relief in what is known as the Federal drought area, comprising a substantial area of municipal units and unorganized territories together with the towns and villages contained in these areas. The provincial governments are required along with the municipalities to bear hospital and medical costs in the Federal drought area and in addition the provincial governments must match the Federal monthly grants in aid, dollar for dollar, as a joint contribution towards direct relief expenditures in rural and urban municipalities outside the drought area.

The Federal contribution to the drought area is an outright gift, not to be repaid and is accompanied by the proviso that neither the whole nor a portion of it may be worked out.

Thus, within the Federal drought area the provincial governments and municipalities still have to bear the not inconsiderable cost of medical care and hospitalization and outside the drought area the municipalities, urban and rural, continue to carry a percentage of direct relief expenditures, the costs of medical and hospital care and administration charges.

Relief Debts Staring

While it is true that the larger urban centres to-day are carrying a smaller percentage of direct relief expenditures, at the same time the accumulated burden of overhead from borrowings to provide for their share of direct relief expenditures in past years has been rapidly mounting during a period when there was no market for their securities and to-day the credit of many of the cities is threatened with collapse, at a time when the full burden cannot be passed on to a decreasing number of solvent taxpayers whose earnings are declining.

Furthermore, it must be remembered that the plight of these cities has been accentuated in recent years by the necessity of taking care of an influx of rural population who have established residence for a sufficient length of time to qualify for city relief.

Faced with this situation it is not surprising that the demand from the governing bodies of cities in both Alberta and Saskatchewan to be relieved of this burden is becoming more vociferous and that in Alberta, at least, the cities' demands are accompanied by a threat to cut off relief on a date to be named unless further assistance is forthcoming from the senior governments. Conferences of the mayors of Saskatchewan cities have been called with prospects that a similar ultimatum may be issued.

Must Go To Ottawa

If the cities are in earnest and demonstrate that there is something more than moral suasion in their intentions to set a relief cut-off date and will carry them out it is quite predictable that the provincial governments will have to lay the unwanted cut on the Ottawa doorstep, for the provinces are in no better financial position to carry the burden than the municipalities themselves.

With the end of the financial tether in sight for the cities and the provinces the need for greater Federal assistance has become very great, but even greater is the need that assistance take the form of work in place of donations or loans in cash and kind, wherever it may be feasible and to the maximum possible extent, in the interests of the recipients and the taxpayers alike, and more particularly should this form of assistance be made applicable to relief in the urban centres.

Work Is First Consideration

In this connection it is interesting to note that the Alberta cities made the provision of work one of two alternatives submitted to government authorities when they asked for relief from the load they are carrying, "either by providing sufficient government-financed works to reduce relief rolls to a minimum or by assuming the entire responsibility for the administration of unemployment relief."

Even if the Federal government should assume responsibility for the administration of unemployment relief the necessity for providing it in the form of work is still just as great as under relief fully financed by the government and administered by the municipality, not only from the viewpoint of the taxpayer but also because of the moral as well as economic benefits to the relief recipient.

Taxpayers are tired of seeing millions spent without any return and a large percentage of relief recipients would infinitely prefer an independent means of support to gifts.

"And when you eloped with the girl, did her father follow you?"
"Did he?" said the young man.
"He's living with us still!"

The big potatoes get to the top of the heap, but they wouldn't be there if it weren't for the little fellows at the bottom.

The preponderant strength in arms in Europe belongs to the nations who desire above all to keep the peace. Kindly recollect it when the next fit of jitters is impending.

Nineteen thousand silkworms are needed to make the summer outfit of a Japanese woman.

B.C. Government Program

Would Extend Northern Boundaries To The Yukon

Premier Pattullo outlined for the British Columbia legislature a 30-point program of government objectives designed to make the province "a beehive of industry and development, with economic and social security from the 49th parallel to its northern boundary, and from Alberta to the Pacific ocean, with our people happy and prosperous."

Among the 30 objectives enumerated by the premier in his speech winding up the budget debate were these:

Maintenance of Empire tariff preference for the benefit of the province's primary industries and at the same time expansion of the province's business with the United States and other countries.

Bringing about construction of a highway through British Columbia and the Yukon.

Extension of British Columbia's boundaries "not only to take in the Yukon territory but also the territory east of the Yukon following the 120th meridian to the North Pole, which would add 400,000 square miles to British Columbia's 365,000."

Establishment of transportation facilities with the Peace River country and northern British Columbia as soon as possible.

Linking of the Pacific Great Eastern Railway—extending now from the head of Howe Sound about 300 miles to Quamash, B.C.—with Canada's national railway systems.

Co-operation with the Dominion to the end that all unemployed and temporarily unemployed able to work may be able to sustain themselves in reasonable comfort.

Others included: improvement of the financial position of municipalities; establishment of better understanding between employers and employees; improvement of labor conditions and improvement through legislation and administration of "the health conditions of our people."

Premier Pattullo's proposal to extend the boundaries of British Columbia to the North Pole would bring the greater part of two Arctic islands and a vast expanse of ice within the provincial borders.

Extension of the province's eastern boundary along the 120th meridian to the Pole would bring about two-thirds of Banks Island in the Beaufort sea and about half of Prince Patrick Island into British Columbia.

Many Priceless Volumes

China's Interest In Bible Was Evident In Exhibition

An exhibition of Bibles in Peking this year evidenced China's interest in the Christian Scriptures. There were 300-entries, representing 69 languages and dialects, of which 17 were Chinese. Among the Bibles were some of a costly character, and others of priceless historical value. The volumes were lent by libraries, universities, individuals and various mission groups. The British and Foreign Bible Society lent the famous Morrison Bible of 1833 and the Morrison New Testament of that same date, printed from wooden blocks made 10 years earlier. There was also the first Protestant Chinese version to be published.

No volume, however, attracted as much attention as the Mingan Bible, loaned by Generalissimo Chiang Kai-Shek—the one he used during his imprisonment at the time of the Sian revolt in December, 1936.

The meat of the Byrd South Polar expedition had to be thawed out for two days before it could be cooked. So solidly was it frozen that it would splinter if dropped.

"Thirsty" Is the meaning of the name Siberia.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

(Ed. Note: We are indebted to B. F. Townsley, Toronto, author of "Mine Finders" for some historical material used in the first part of this story.)

There are some things you want to do, seemingly never arrive at the point where they are possible of accomplishment. My visit to Flin Flon was one thing of the kind. I had planned for years, yet July, 1937, was the first time I got there.

While living in Winnipeg from 1916 to 1923, during some years of which I was on the publicity committee of the city, the name Flin Flon intrigued me. Coming East before the big developments, under the Hudson Bay Mining and Smelting Co. took place it was impossible to get back—this year I "made the time" and was fully repaid for the effort in going west from Toronto.

In a virgin forest on the banks of a lake was where Tom Creighton found this mine—to-day you wouldn't recognize the spot. However, let's start at the beginning because this is going to be a long story and must be told in bits—right from the first gold discovery in Manitoba, 66 years ago, to the present Flin Flon position of production at the rate of 4,500 tons daily and of a town of 7,000 built on solid rock in seven years.

The Trail To Flin Flon

In 1881 gold was discovered on Block Island in Winnipeg and on the mainland and on the south side of the Winnipeg River near its mouth in 1885. These early discoveries failed to attract much interest in gold mining, although in 1908 a few more claims were staked on the Winnipeg River.

Major A. E. Pelletier, a French-Canadian Boer war veteran, in May, 1911, assigned an inspector of the R.C.M.P. to prospect for gold.

He, with his Indian partner, Jack Spence, was at Big Rice Lake, Manitoba, in January, 1911, and though the area was covered with snow it appealed to him, so he came back in May—1911 with Duncan Twoheart, another Indian. They pitched their camp, lit a fire and two days later the fire had melted the snow and revealed free gold in the rocks. He named the find Gabrielle (after his second best girl), then staked an intervening claim, and named it San Antonio after his patron saint.

From 1911 to 1927 small mines were operated for short periods with indifferent success in Manitoba. In 1927 the Central Manitoba Mines started production with a mine only 125 miles northeast from Winnipeg.

Amiak, or Beaver Lake, in Saskatchewan, adjoining the Manitoba boundary, is on the main route from Winnipeg to the Hudson Bay coast, lying to the north and west—famed for its moose. As early as 1845 French fur traders had reached the Saskatchewan River. Samuel Hearne surveyed the "trade possibilities of the area in 1773 and founded Cumberland House for the Hudson's Bay Co. at Pine Island, 60 miles northwest of what is now The Pas, established immediately.

Won Five Scholarships

Record Made In One Year By Toronto Girl Student

Winner of five scholarships valued at \$2,975 during the past year, Annie MacPherson had the past year's record made in one year by East York Collegiate in Toronto. She graduated from the school last year.

Awards won by the student include the first Edward Blake scholarships valued at \$425 for courses at University of Toronto; the Algonquin memorial scholarship, \$600; the Alkens scholarship, \$625; class of 1911 scholarship, \$650; and the second Alkens scholarship, \$625, at Victoria College, University of Toronto.

At the commencement she was given prizes for the best essay and the best short story written for the school last year. She was her class valedictorian.

An Unusual Experience

Man Nearly Lost Life Swimming In Shining Lake

A man was swimming in a mountain lake in Jamaica.

He glanced at the shore, where he had left his clothes. They seemed to have been moved a considerable distance up the mountain-side. He realized that it was not the clothes that had moved, but the lake. It was shrinking visibly as he swam in it.

He reached the shore only just in time. A few minutes later the last swirl of water disappeared through a hole in the mountain, through which he would have been sucked to death.

At one time, the penalty was more severe for killing a stag than for killing a human being in England.

A goose has about 12,000 muscles under the skin that do nothing but control the action of the feathers.

This is Tom Creighton in 1937—the man who found the Flin Flon mine in 1915.

ately after the free-trading French. A year later, Joseph Frohisher and his brother, Alexander Henry, wintered at Amiak Lake, while in 1784 David Thompson mapped its geographical features.

But it was fur, not minerals, that interested the pioneers, and it remained for a mine to inadvertently guide a prospector to Manitoba's largest mine.

In 1905, when the Hudson Bay Railway was rushing northeast over the muskeg toward Hudson Bay, the trading post at The Pas received fresh stimulus, and in 1908 the German prospector, Brunne, staked the first claim in the area of Cranberry Lake. The first, if desultory, prospecting of the area, may be credited to Canadian Townsley, Ltd., which had real estate interest in The Pas, and which sent out a party of prospectors comprising Hugh Vickers, George Bancroft, and W. B. Wright. In 1911 this group staked claims for copper along the Hudson Bay Railway at Whiting Lake. The first systematic prospecting in the area, however, may be said to date from April, 1913, when Tom Creighton, a cautious, experienced prospector and a veteran of many camps, with John Mosher, Dan Mosher and Leon Dine, first prospected around Lac La Ronge.

Early in the spring of 1913, before the break-up, some citizens of Prince Albert, Saskatchewan, grubstaked Creighton, John and Dan Mosher and Leon, who prospected around Amiak, or Beaver Lake, just across the inter-provincial boundary from the present site of Flin Flon. In September of that year, they staked the Prince Albert claims on the shores of Beaver Lake, the first gold discovered in that area.

The first engineer to examine and sample their find was John Alexander, a graduate of Halifax and graduate of Queen's University, who was acting for his principal, the Canadian Mining and Exploration Co.

Next week we tell you just how the name Flin Flon was chosen.

Synthetic Products

Goering Says Germany Will Corner The World Markets

General Hermann Goering, director of the four-year self-sufficiency plan, predicted that one day Germany would corner the world market in synthetic products.

When that day comes, he declared in a speech at Hamburg, a world which now looks with scorn upon Reich efforts in the field of synthetic products, will buy these products on the German market.

In a warning to Germans not to waste anything, he said he felt a "superior joy when I became the greatest collector of garbage and bones in Germany."

National interest must take precedence over private or company interests. He reminded Germans of the necessity of obeying economy regulations.

"I am compelled to repeat with insistence that these laws, which were not promulgated as a joke, must be obeyed," he said. "Remember the sacred character of bread. Be parsimonious with bread. Waste nothing. Everything has value. Everything can be used."

Turning to foreign policy, Goering declared the "sleazebag" axis—from Berlin to Rome—sweeps across central Europe and has been extended to Tokyo, and is a better peace axis than the "league of gossip" assembling at Geneva.

"Now, then," roared the sergeant-major, as he dismissed the men, "you will parade again at 2 o'clock precisely. And when I say 2 o'clock precisely, I don't mean five past; I mean five to."

Exasperated Lady Golfer—Boy, I thought you came out with me to look for balls.

Boy—Lady, we've both been had, I thought you came out to play golf.

Not Afraid Of Work

Dr. John Beattie Looks After World's Finest Anatomical Collection

Dr. John Beattie, for whom a handsome new research laboratory is being built above the headquarters of the Royal College of Surgeons in Lincoln's Inn Fields, London, has charge of the world's finest anatomical collection. It contains over 30,000 specimens. He is a Belfast man, with a tremendous capacity for sustained work, and has often gone for weeks at a time with only three or four hours' sleep a night, says the News of the World. He keeps himself fit by playing golf and squash, and by occasional excursions in a sailing yacht. His wife, like himself, is a doctor, and they have two young children. At present he is engaged in important work on the function of brain cells.

ALICE STEVENS' RECIPES

MINCE MEAT PATTIES

FOR HOLIDAY SEASON

The holidays call for parties and good times, particularly when the young folks are home from work and from college. Refreshments are an important consideration and there are certain traditional dishes that are accorded a place on the holiday menu.

Mince-meat patties add to the success of any party. In fact, many people try to have a Mince Meat Party at twelve different times, during the holidays, believing that each one makes for a happy month during the ensuing year. Whether that theory is correct, is difficult to say, but we all agree that mince-meat patties are pretty fine after skating or a tobogganing party.

I have a special recipe for mince-meat very easy to serve. They can be made ahead of time and simply warmed up. This recipe is a mince-meat can be made ahead of time—in fact, many people make a winter's supply at once.

To make the mince-meat, make a rich pastry. Line tart shells with the pastry. Fill with mince-meat and cut a small hole in the top of each. This can be cut with a cookie cutter or with a sealer ring. Make small openings in the top of the steam to escape. Moisten the edges with cold water and press together. Bake as you would a mince pie.

I have a special recipe for mince-meat which I will be pleased to send you. Many people make their mince-meat this way. This recipe is a definite recipe but they have a few little trade secrets which they do not like to tell you. This recipe is a tried and tested one.

It is not wise to serve too many of these rich foods during the holiday season. The digestive system cannot stand up against too much strain, particularly when coupled with late hours. Serve some simple desserts to help balance up the meals.

BLUSHING APPLES

8 to 10 apples
1 cup sugar
1 cup water

Make a syrup by boiling the sugar and water. Select red apples. Wash and core them. Do not peel. Add enough apples to cover the bottom of the saucepan. Cover with a tight-fitting lid. Simmer and turn the apples occasionally. Watch carefully so that the apples do not get overcooked. Remove the apples to the serving dish. Add the remainder of the apples to the syrup and cook in the same way. Pour the syrup over the apples. It will take up some of the pink color of the apples.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Another Invention

Method Found Which Converts Fibre Into Silk

A story in the Canadian Science Monitor says the pineapple now bids fair to become a strong, although not the only, competitor of the hard-working silkworm, a way having been found to convert its fibres into "silk." Invention has become so ingenious converting plant life into serviceable cloth that it would occasion only mild surprise to learn that a good quality of underwear is being made from spinach.

Both "pimento" and "pimlico" are names derived from the Spanish word for pepper.

CHAPTER III.—Continued

"If I may say so," Captain Duff-Hooper said, "that is not a particularly strong reason for involving yourself in his financial affairs."

"Possibly not," admitted the Earl, "but I liked old Gerald. He made me feel superior. Perhaps I did make a mistake—but I made it. At any rate," he added, triumphantly, "it wasn't as big a fool as the fellows who advanced a noodle like Gerald twenty thousand pounds."

The Earl looked rather less like an earl than a man who had come to fix the piano and rather more like a strawberry dipped in whipped cream than either; for his round, vague face was a rich, ripe red and his ruff of hair was as white as a laundered dove. He was a small-sized man who looked as if at any moment his bony old suit of dun-hued shetland would swallow him up.

"We are here," began the Earl, in the formal public tone he adopted when presenting prizes at a cat show. "To consider a most important matter."

Warehouses at Calgary, Regina and Winnipeg

"Tatting," muttered the Earl, aggressively. "Pancake?"

"And you can't meet them, isn't that so?"

"I thought, from what he said, it was tatting," said the Earl. "Now that I could be interested in. But tatting! I ask you!"

"How much money must you have immediately?"

"A good bit."

"Please concentrate, father. How much exactly?"

"One thousand and two pounds," said the Earl.

"If you can't pay, then what?"

"It will be unpleasant," replied the Earl. "Last week I had a letter from those interest Johnnies in London. They took a rather gloomy view of the matter."

"May I see that letter?"

"I'm very much afraid I used it to light my pipe," admitted the Earl. "Hunted high and low for a match, but no match, and so—"

"Surely you remember what the letter said."

"All too well. It said they would take steps."

"What steps?"

"Just bung us out of here, bag and baggage," said the Earl.

"You can't mean they'd take Bingley from us?" cried Rosa, shocked.

"So they intimated in what I believe are called no uncertain terms."

"But they couldn't. They wouldn't dare do anything so drastic," said Rosa.

"Oh, you don't know those hyenas," said the Earl. "They're a confoundingly drastic lot when they've caught one bending. When they say they'll take steps, they'll take steps, you may depend upon it. Take steps! What a droll way to put it."

"But they have no claim on the castle."

"The regrettable fact is they have," said the Earl.

"How could they have?" asked Duff-Hooper, in an endeavor to demonstrate that he really did have a head on his narrow shoulders.

"When I was trying to get Gerald out of his mess there was a lot of chat about security and collateral and so forth and so forth, and I did sign some papers," the Earl said.

"Oh, father!"

"It's no use, my dear, moaning. Oh, father! and looking tragic," said the Earl. "I did what I did. You could hardly expect me to foresee that poor Gerald would try to take that high wall on that cranky mare of his. Always told him she'd never make a jumper. Weak knees. If the old buffer had lived he'd have paid me back when he came into his title. But he would try to jump that absurd name—"

"Father," interrupted Lady Rosa, "what are we to do?"

"I wish I knew," said the Earl.

"We're in real danger of losing Bingley, our home, our family's home, for many generations."

"You state the case with horrible clarity."

"When?"

"They mentioned something about the first of the year."

"That gives us six weeks to raise the thousand pounds," she said. "Can we?"

"Not an earthly," said the Earl. "Yesterday when I was up in town I talked to MacKintosh."

"What did he say?"

"He was distinctly down," replied the Earl. "Haven't seen old Mac so Scotch in forty years. I dropped a hint that, with taxes and so forth, I hadn't a spare ben. Of course, as my solicitor, he knew that already."

"Did he say they had any legal right to take over Bingley?"

"I regret to report he did. He asked me to pay."

"Did he say with what?"

"Well, no, he didn't," said the Earl. "I brought up the point, too. He dived out a lot of legal language about liens and rates and so forth which I can sum up by saying that the estate is in one devil of a pickle."

"As a last resort we could go to our friends," commenced Lady Rosa—"I toyed with that idea myself," said the Earl. "Wandered into the House of Lords and hadn't gone five yards when two peers asked me for a loan of a few quid before I could ask them for a loan of a thousand. Ran into Bumpy Beldingdon, and he looked more like a scarecrow than a duke. Patches in his pants. His country squire he calls them. Says that when his last pair of trousers were out he'll have to wear the family armor. So we're all in the same bowl of soup."

"Wish I could help," put in Captain Duff-Hooper. "Sorry but can't. Can hardly feed my nags as it is. I'll be sharing their oats with them shortly."

"Thanks, old boy. Good of you, I'm sure," said the Earl. "Why, Rosa, you're crying! What's wrong?"

"Wrong?" Rosa sobbed. "How can you ask that? We're going to lose the home we love, the place where I was born, and you were

born, and where all the Bingleys have been born and lived. We're going to be turned out to make room for a lot of strangers, filthy nasty, stupid vulgarians who will have no respect for it and its traditions and all the beautiful things it has. Isn't that something to cry about?"

"My dear child," said the Earl of Bingley, gently, "don't think I haven't indulged in a spot of private blubbering myself. I'm older than you—I mean to say being your father I naturally would be, wouldn't I?—and all my memories are bound up in Bingley. I was born here, played here as a boy, was married here, and lived here all my days, and I expected to die here."

The Earl blew his nose, and went on.

"I'd rather have them cut my heart out and eat it on toast than let Bingley get out of the family. However, tears are not tuppenny bits or I'd be there until the thousand. Let's not give up hope, Rosa. Let's remember who we are and face it. So turn off the tap, there's a dear."

Rosa dried her eyes, she said.

"You're right, father," she said. "I'm sorry I went asy on you. I know you love every alone and beam and flower as much as I do. I know you're just not letting life get you down—"

She came over and kissed him on the strawberry brow.

"Talking of hope," said the Earl, "there is a ray."

"Really? What?" asked Rosa eagerly.

"Well, it doesn't exactly dazzle one," said the Earl, "but it's better than a damp match in a swamp. In this morning's post I received a letter from old MacKintosh—"

"Read it to us, please."

"Gladly," said the Earl. He fished in his pockets and pulled out a packet of letters, many of them sore and dog-eared.

He opened one and read.

"Honored air: If I bask before you, let me get rid of same, reasonable."

Respectfully
M. MacKintosh, Bataclater, P.S. Also rats, mice, moths, beetles, etc.

"That's not it," concluded the Earl. "Wonder why I kept this. Bats don't bother me."

He tossed the batclater's epistle on the fire, opened the next letter and read.

(To Be Continued)

Baroness Likes Simple Life

Belgian Writer Spending Winter 20 Miles North Of The Pas

Amie Gulgolt de Mishaegen, writer and traveller, left The Pas, Man., recently bound north to Granville Lake to spend the winter. She is a baroness with a palatial home, the Chateau de Mishaegen in Belgium, but simple life in the north attracts her.

The baroness is writing a travel book, based on life in the north. She has written two along similar lines, both in French, and hopes to have her third completed this spring. The work will be done in her lonely cabin, 200 miles north of The Pas.

A tour of Africa was added recently to her lengthy jaunts about the globe. She crossed the Sahara Desert by automobile and during hunting expeditions in Africa's wilds, bagged a water buffalo, lions, antelopes and other game.

The north drew her in 1931 and she staked several mining claims on reaching Manitoba. Then she glimpsed Granville Lake and the winter of 1934 saw her busy trapping.

Usually the trek to the cabin is made by dog team in winter and canoe in the summer, but this year a plane took her to Granville Lake and months of study and writing.

Used Modern Method

Indian Lost On Reservation Followed Electric Line Into Village

Earl Beauregard, 18-year-old Chipewyan Indian, was lost 20 hours in the wilds of the Bad River Indian reservation near Ashland, Wisconsin.

Did Earl look for the mossy side of the trees or tell the direction by the stars, send up smoke signals or rely on the red man's word lore to get his bearings?

Earl did not. He merely looked for the white man's electric power line and followed it into the village.

We don't need men with new ideas as much as we need men who will put energy behind the old ideas that are practical.

The "precious" metals are gold, platinum, and silver; mercury, also, sometimes is so classified.

IF YOU'RE ALWAYS CATCHING COLDS READ THIS

SOMEbody TOLD ME THIS RELIEVES A HEAD COLD IN A HURRY

LADY, THEY DIDN'T TELL YOU HALF-JUST USE IT SOON ENOUGH AND IT HELPS PREVENT MANY COLDS

VICKS VAPOR-NOL
Keep it Handy... Use it Early

This specialized medication—Vicks Vapo-Nol—is expressly designed for the nose and upper throat, where most colds begin—and grow. Used in time—at the first sneeze or sniffle or irritation in the nose—it helps to prevent many colds, or to throw off head colds in their early stages. Even when your head is all clogged up from a cold, Vicks Vapo-Nol brings comforting relief—lets you breathe again!

Tobacco Marketing Co-operation

Canada Growers Realized Profits In Excess Of \$100 Per Acre This Year

Simcoe, Ont.—With the final curtain rung down on the 1937 tobacco market, growers of Canada's newest large agricultural crop were able to reckon their profits in excess of \$100 per acre.

The year's market, which saw 66 million pounds of fine-cured tobacco snapped up by buyers in less than ten days, realized in excess of fifteen million dollars for the 1700 producers who this spring planted 50,000 acres to the crop. Available figures show that growers produced a return of approximately \$300 per acre.

Chief problem until 1934 was marketing. To-day Ontario's fine-cured tobacco growers belong to a marketing association which rigidly controls price and acreage. Each year, with the co-operation of the prospective buyers of the crop, the tobacco production is "budgeted" and the planting is done purely on a basis of the available market for that year's crop, taking into consideration, of course, growing export prospects.

The growers who comprise the association are allotted certain acreages to plant tobacco.

When the crop is harvested, representatives of growers and buyers—all joint members of the marketing association—meet and agree on an average minimum price for the crop.

In 1937, for instance, the average minimum was set at 25 cents per pound, but the price actually paid was 29 cents. This year the average minimum was 24½ cents and the price paid will probably exceed 27 cents.

With the co-operation of the farmer and the buyer, a crop of 56 million pounds—more than twice the 1936 production—was moved this year at a price which sets a new high record for returns.

The tobacco industry has proved a fruitful field for labor agitators. During the harvest season in August, 1936, the industry was halted when farmers succeeded in obtaining university students and unemployed youths and women from nearby cities who were willing to work for three dollars and more per day. When the market opened, another group of agitators succeeded in organizing 200 of the 1700 land-owners and temporarily delaying the market, but the agitation collapsed for lack of support among the representative section of the industry.

Today the tobacco industry in Canada is unique on the North American continent in that growers have budgeted the annual production months ahead of time, amicably agree upon a fixed price which permits a substantial profit for all branches, and work hand in hand for future expansion.

Rhodes Scholar

Scholarship For Alberta Goes To Ralph E. Collins

Award of the 1937 Rhodes Scholarship for Alberta to Ralph E. Collins, now a student at University of California in Berkeley, was announced at Edmonton.

Second graduate to receive the Alberta award, usually granted to an undergraduate student, Mr. Collins, 23-year-old son of a China missionary, was an honors student in English, receiving a bachelor of arts degree from the University of Alberta in 1935 and the masters degree in 1936.

Robert Lloyd Fenerty of Calgary was the only other graduate to win the award, being chosen in 1935.

Born in China, Mr. Collins is the son of the late P. B. Collins. His mother is now the wife of Rev. W. T. Haggith, pastor of the United church at Jasper, Alta.

Jerusalem was surrendered to General Allenby on Dec. 9, 1917, but he did not enter the city until two days later.

In Sumatra, the Batak dental does his work in the open market with the patient lying flat on his back.

A suit of clothes was made in three hours and four minutes from the time the sheep was skinned in Yorkshire, England, in 1931.

An exchange asks in a headline: "Does meat make one ferocious?" We'll say it does—if he can't get it when he wants it.

Little Helps For This Week

If ye endure chastening, God dealeth with you as with sons. James 5:11.

Trials must, and will befall; But with humble faith to see Love inscribed upon them all, This is happiness to me.

Be not afraid of those trials which God may see fit to send upon you. It is with the wind and storm of tribulation that He separates the true wheat from the chaff. Always remember that He comes to you in your sorrows as well as in your joys. He lays low and He builds up. You will find yourself far from perfection if you do not find God in everything. He has provided a sweet and quiet life for His children, could they improve and use it, a calm and firm conviction in all the storms and troubles that are about them however things go, and they may find content and be careful for nothing, but in everything give thanks.

Jasper National Park

Color Movie Of Scenes Around Mount Robson Wins Prize In New York

Hamilton H. Jones, of Toronto, was announced as winner of the prize awarded by the Amateur Cinema League of New York for the best non-theatrical motion picture taken in the world in 1937.

Jones' film, recording the Rocky mountains in natural colors, won him the Hiram Percy Maxim plaque and a cash prize of \$100. It was entitled "Western Holiday" and was set in Mount Robson and Jasper National Park.

The film records a trip in Mount Robson provincial park to Berg lake and Tumbling glacier at the foot of the mountain, and a trip through Jasper National Park.

All of the unrelated items in the 18,000 parts of a piano must be correlated to a point where contraction and expansion amounts to less than one two-thousandths of an inch.

Prepare for '38 Drive on Hoppers

Despite the heavy mortality rate among grasshoppers this due to natural causes, "heavy artillery" is already being lined up in event of a further outbreak next season with that in mind, federal officials have issued bulletins describing various types of home made bait spreaders, utilizing various odds and ends found on a majority of farms.

The mechanical spreaders are said to have worked well, especially in the territory surrounding Swift Current, Sask., where lands are dry and the hoppers have digested almost everything in sight except barbed wire fencing.

The Government bulletin points out there are three basic parts to the anti-hopper spreader—the "hopper" and the automatic feed device; the spreader table, and the "power plant."

Various methods of construction and necessary parts utilizing such articles as oil barrels, lumber, iron rods, sheet metal—and how to put them together—are all outlined in official bulletins. Detailed information may be obtained from any of the provincial departments of agriculture or Dominion experimental stations in the West.

One type of spreader—the tractor type—has as its most important unit, the "hind quarters" of an automobile chassis, complete with propeller shaft.

Power for operating the various types of poison spreaders can be obtained from pulleys attached to the rear wheel of a wagon or truck or tractors can be used.

Woman Took 14 Coyotes In Two Weeks

COMREY, Nov. 26, (Special) Looking so slender and trim in her buckskins and furs that she resembled more a Zane Grey heroine than a mother of a six-year-old son, Mrs. Maude Ratcliffe modestly admitted she had trapped fourteen coyotes during the past two weeks. "But," she hastily added, "that is not very many."

The Ratcliffes are hibernating at the lower camp of the N. ranch on the Milk river. It is a picturesque spot in summer, but in winter the isolation is complete. Their only mode of travel will be on horse-back. Mr. Ratcliffe would necessitate much absence from home, so his wife and small son carry on very capably in his absence.
